Nawaz Muztaba

SOC Analyst | Security Monitoring & Incident Investigation
Mohali, Punjab, India | Open to Relocation | + 9 1 6200289203 | nawazmuztaba000@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

SOC Analyst with hands-on experience in security alert triage, authentication and endpoint analysis, incident reporting, and severity-based escalation. Experienced with Rapid7 InsightIDR, SentinelOne, and Jira, with working knowledge of Microsoft Defender and KQL. Currently gaining hands-on experience with FortiSIEM for security monitoring and event correlation. Develops Python security projects focused on detection automation, AI-agent authorization, and adversarial testing.

PROFESSIONAL EXPERIENCE

SAFEAEON INC. | SOC Analyst | Mohali | March 2026 – Present

- **Investigated and triaged 1000+ security alerts** across client environments using **Rapid7, SentinelOne, and Jira**, identifying **250+ reportable alerts including 30+ client-verified true positives** across authentication anomalies, account lockouts, privilege changes, mailbox activity, and malware-related events.
- **Performed alert validation and incident investigation** through seven-day historical analysis of user authentication, endpoint activity, process execution, and related security events, determining reportability and supporting escalation of suspicious activity.
- **Prepared client-facing incident reports and supported SLA-driven response workflows**, escalating High/Critical alerts within **15 minutes** and delivering investigation reports within severity-based response timelines.

VAISHNAV TECHNOLOGIES PVT LTD | SECURITY INTERN - VAPT & PENETRATION TESTING | JAN 2025 - MAR 2025

- Conducted web and network VAPT across internal applications and network segments using **Burp Suite, Nmap, OpenVAS, and Nikto**, identifying vulnerabilities including SQL injection, XSS, exposed services, and security misconfigurations.
- Performed post-exploitation and privilege-escalation testing, documented findings with **CVSS severity**, and supported red-team exercises through IOC analysis and **MITRE ATT&CK** mapping.

TECHNICAL SKILLS

- **Security Operations:** SOC Monitoring, SIEM, Alert Triage, Log Analysis, Incident Investigation, Incident Reporting, Escalation
- **Platforms & Tools:** Rapid7 InsightIDR, SentinelOne EDR, Microsoft Defender, Jira, Wireshark, Nmap, Burp Suite
- **Querying & Scripting:** Kusto Query Language (KQL), Python, SQLite
- **Systems & Networking:** Windows, Linux, TCP/IP, DNS, HTTP/HTTPS, DHCP, VPNs, Firewalls, Network Traffic Analysis
- **Frameworks & Supporting Skills:** MITRE ATT&CK, OWASP Top 10, Vulnerability Assessment
- **Security Analysis:** Authentication & Endpoint Log Analysis, IOC Analysis, Prompt-Injection Testing, AI-Agent Tool Authorizatio

PROJECTS

Intelligent SOC Automation System | GitHub — Dec 2025 - Jan 2026

- Built a SIEM-style threat detection system processing **1,000+ simulated log events**, correlating **8+ attack patterns** including brute-force, port scanning, and anomalous authentication with **MITRE ATT&CK** techniques.
- Implemented severity-based alert prioritization and a Redis real-time alert queue handling **200+ concurrent events**, reducing analyst triage time by **~40%** across 5 attack-simulation scenarios while generating structured remediation reports.

AgentCheck V2 Alpha: AI-Agent Tool Authorization | GitHub — Nov 2026

- Built a local **Python/Qwen/Ollama** testbench for indirect **prompt-injection scenarios,** strict tool-call validation, **independent Guard authorization**, and auditable SQLite service effects.
- Verified a separate forced **unauthorized tool request was denied before SQLite access**; PermitLab-wide private CI passed **1,295 tests** per **Python version (3.11–3.13)** with **95.22%** branch coverage.

Sentinel-X: Automated VAPT & Attack Surface Framework | GitHub — Aug - Sep 2024

- Automated attack-surface scanning across **10+ target environments**, detecting **25+ misconfigurations** including exposed services, firewall gaps, and weak TLS configurations, with risk scoring aligned to **NIST CSF**.
- Developed a modular Python framework covering reconnaissance, service enumeration, TLS analysis, and reporting, reducing manual reconnaissance time by **~60%** and generating actionable remediation reports.

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900) - Microsoft
Certified Threat Intelligence & Governance Analyst (CTIGA) - Red Team Leaders
Logging and Monitoring in Google Cloud - Google Cloud / Coursera
Digital Forensics Essentials (DFE) - EC-Council / Coursera
Cloud Computing, NPTEL, IIT Kharagpur

EDUCATION

B.Tech. in Computer Science & Engineering, Cybersecurity Specialization — 2022 - 2026
Lovely Professional University, Phagwara, Punjab | CGPA: 7.5

Senior Secondary (12th Grade) (PCM)
Trident Public School, Muzaffarpur, Bihar | 84% — 2019 - 2021
